RABIA CETE

Information Systems Engineering

SUMMARY

I am an information systems engineer with a strong passion for learning and a focus on software development, especially in mobile applications. I specialize in various testing methodologies, including automated testing. Currently, I am learning Swift to master the iOS platform.
My goal is to create user-friendly apps that enhance daily life, while continuously improving my skills and staying updated with the latest technologies. I aim to succeed in the iOS domain by providing valuable and creative solutions to users.

BILGIYON SOFTWARE   /August 2024 - September 2024

PROJECT

Web Application Development Project

I developed a web application using the ASP.NET MVC framework for a business specializing in accessory sales. The application facilitates seamless browsing and purchasing of accessories offered by the business.

TUBITAK- 2209-A - University Students Research Projects Support Program
We are developing a mobile application that reads cosmetic product ingredients using image processing technology.

Work Order Mobile Application
I developed a mobile application using Swift UIKit, allowing managers to input work orders and users to view them.
